
Stan & Bonnie Lutz

Stan has had long time interest in how science, the age of the earth, and dinosaurs fit with the Bible. He has done research and studies in this area for many years. He worked at Mt. Blanco Fossil Museum in Texas from April 2005 to March of 2006. He makes repli-cas of fossils and dinosaurs. Bonnie's interest in Creation Science began from listening to various speakers on the subject. Stan and Bonnie met in 2003. They married in January 2007 and live in University Place, Washington.

FOSSILS & FLOODS: FACTS & FABLES

Statement of purpose:

I Peter 3:15 states “But sanctify the Lord God in your hearts: and be ready always to give an answer to every man that asketh you a reason of the hope that is in you with meekness and fear.”

Our purpose is to equip the Church with answers to any who have questions about evolution, and the age of the earth using science and the evidences of the world and universe around us. And to bring others to Christ, the Maker of the universe (John 1:1-3), by showing them that God did make them, and there is really no other answer.

We try to take complex science and make it understandable to all audiences.

Creation is defensible by science. It would be a greater miracle for something to have been made by nothing because there had to be the same amount of miracles take place for us to exist, whether God made everything or everything made itself.

Presentation titles:

1. Mathematical Probabilities: Creation Or Evolution. This presentation explores the mathematical numbers and impossibilities of the first cell ever happening by chance.
2. The Age Of The Earth. This presentation uses science to show evidence of a very young universe despite what we are taught in school.
3. What Happened To The Dinosaurs? Do dinosaurs fit with the Bible? Did man and dinosaurs co-exist? Are all dinosaurs really extinct? What does the evidence tell us?
4. Noah's Ark. Shows evidence that the Ark is real and cultures that know of Noah.
5. Ancient Man. What are the so-called apemen? Was ancient man really a cave dweller? Where is the evidence of "man evolving?" And how far back does man go?
6. Ancient Technology: Was ancient man advanced or was he dumb?
7. Were Biblical Giants real?
8. The Great Missoula Flood.
9. The Great Bonneville Flood.
10. Mt. St. Helens.
11. Problems Caused In Modern Times By Evolutionary Thinking.
12. Lies In The School Textbooks: What Can We Do About It.

Saber cat skull from the La Brea Tar Pits, California

We will do any presentation or combination of presentations that you want. They will all stand alone or all work together.

We have seminars for all age groups, from young children, middle school age, high school, and adults. We try to take complex science and make it understandable to all ages.

We have seminar notebooks for sale that go with each presentation that explains in more detail everything presented with a bibliography. Every scientific statement is presented with at least one paper or article from a peer-reviewed journal.

We have some books to sell from a number of different authors presenting science from Biblical and secular perspectives.

We have a few fossil replicas for sale.

Biblical Giants

What has science found that is not publicly known, and why does it seem this evidence is hidden from the general public.

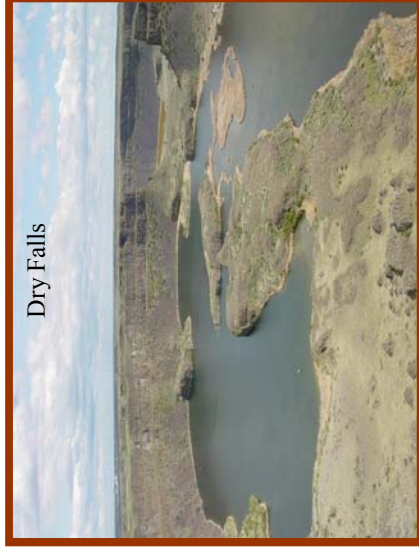

Post-Noahic Flood Catastrophic Events

The three seminars about Mt. St. Helens, The Great Missoula Flood, and the Bonneville Flood are all used to show that landscapes can change very rapidly and things like the Grand Canyon could have happened in a very short time.

Ancient Technologies

We show several ancient civilizations that are clearly very advanced, and did things that we still can not do today. Astronomy as an advanced science, advanced surgery, buildings that stand today, and metallurgy beyond our abilities.

Dry Falls
